Insulation Outbound
March 2016

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, or for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.
Sto Powerwall®ci System Components

Detail No.: 63s.00
Date: March 2016

Notes:
1. StoGuard® joint treatment options:
   a. StoGuard® RapidFill® (joints ≤ 1/4 inch [6 mm])
   b. Sto Gold Fill® with StoGuard® Mesh (joints ≤ 1/8 inch [3 mm])
   c. StoGuard® Fabric with StoGuard® air and moisture barrier (joints ≤ 1/8 inch [3 mm])

2. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm) (Not for use with Sto Guard Fabric)

3. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®.

4. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction.

5. Prevent the accumulation of water into or behind the stucco, either by condensation or leakage into the wall construction, in the design and detailing of the wall assembly. Drainage is not a replacement for sound design and construction practice. Refer to Sto Tech Hotline Nos. 0403-BSc, Critical Detail Checklist for Wall Assemblies, and 0603-BSc, Moisture Control Principles for Design and Construction of Wall Assemblies, for more information.

6. Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of Turbostick adhesive to install maximum 2’x8’ (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

ATTENTION
Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.
Sto®Powerwall®ci
Rough Opening Protection with StoGuard®Fabric

Step 1
Apply StoGuard® air and moisture barrier liberally at corners of rough openings and place StoGuard® RediCorners™ in wet membrane. Use brush, roller, trowel or taping knife to fully embed StoGuard® RediCorner™

Glass Mat Gypsum Sheathing (Compliance with ASTM C 1177)

Step 2
Immediately apply StoGuard® air and moisture barrier liberally to inside of opening and around outside of head, sill and jambs.

Center 6" (150 mm) wide StoGuard® Fabric on outside corners and press into wet membrane along the head, jambs, and sill with minimum 2" (50 mm) overlaps of adjacent fabric. Use brush, roller, trowel or taping knife to fully embed.

Step 3

Notes:
1. StoGuard® joint treatment options:
   a. StoGuard® RapidFill
      (joints ≤ 1/4 inch [6 mm])
   b. Sto Gold Fill® with StoGuard®
      Mesh (joints ≤ 1/8 inch [3 mm])
   c. StoGuard® Fabric with StoGuard®
      air and moisture barrier
      (joints ≤ 1/8 inch [3 mm])

2. Rough Opening Protection Options:
   a. Sto Gold Fill with StoGuard®
      Mesh (refer to Sto Detail 20.20M)
   b. Sto Waterproof Air Barrier with
      StoGuard® Fabric
      (refer to Sto Detail 20.20F)
   c. Sto Waterproof Air Barrier with
      StoGuard® Fabric and StoGuard® Tape
      (refer to Sto Detail 20.20FT)
   d. StoGuard® Tape
      (refer to Sto Detail 20.20T)
   e. StoGuard® RapidSeal®
      (refer to Sto Detail 20.20R)

3. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm)
      (Not for use with Sto Guard Fabric)

4. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®

5. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction
Step 3
Immediately coat the entire surface of the wall and into rough opening with StoGuard® waterproof air barrier membrane to produce a void and pinhole free surface.

Edges of StoGuard®RediCorners™ and StoGuard®Fabric must lay flat, wrinkle-free, and be fully embedded in the membrane and fully adhered to the substrate or previous layer of StoGuard® Fabric.

StoGuard® Waterproof Air Barrier Membrane

Insulation Note: Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of Turbostick adhesive to install maximum 2'x8' (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

Notes:
1. StoGuard® joint treatment options:
   a. StoGuard® RapidFill (joints ≤ 1/4 inch [6 mm])
   b. Sto Gold Fill® with StoGuard® Mesh (joints ≤ 1/8 inch [3 mm])
   c. StoGuard® Fabric with StoGuard® air and moisture barrier (joints ≤ 1/8 inch [3 mm])

2. Rough Opening Protection Options:
   a. Sto Gold Fill with StoGuard® Mesh (refer to Sto Detail 20.20M)
   b. Sto Waterproof Air Barrier with StoGuard® Fabric (refer to Sto Detail 20.20F)
   c. Sto Waterproof Air Barrier with StoGuard® Fabric and StoGuard® Tape (refer to Sto Detail 20.20FT)
   d. Sto Guard® Tape (refer to Sto Detail 20.20T)
   e. StoGuard® RapidSeal® (refer to Sto Detail 20.20R)

3. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm) (Not for use with Sto Guard Fabric)

4. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®.

5. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction.

ATTENTION
Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. Box Window at Sill, Jamb, and Head

One-piece Expansion/Control Joint (typical)
Head Flashing
Sealant dab at control joint termination (to divert water to exterior)
Glass Mat
Gypsum Sheathing (ASTM C 1177 compliant)
StoGuard®-EmeraldCoat
Dow Type IV XPS Insulation Board (See Insulation Note)
Code Compliant Building
Paper or Felt (optional if assembly is drained behind insulation board)
Sto DrainScreen™
Expanded Galvanized Self-Furred Diamond Mesh
Metal Lath
StoPowerwall™-Scratch Coat
StoPowerwall™-Brown Coat
Sto Primer
Sill Flashing
Sto Textured Finish

Insulation Note: Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of Turbostik adhesive to install maximum 2’x8’ (6000x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

Notes:
1. StoGuard® joint treatment options:
   a. StoGuard® RapidFill (joints ≤ 1/4 inch [6 mm])
   b. Sto Gold Fill® with StoGuard® Mesh (joints ≤ 1/8 inch [3 mm])
   c. StoGuard® Fabric with StoGuard® waterproof air barrier membrane (joints ≤ 1/8 inch [3 mm])
2. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal® (vapor impermeable)
   d. Sto AirSeal® (high perm)
   (Not for use with Sto Guard Fabric)
3. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®.
4. IMPORTANT. Refer to Sto Detail 62s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction
5. Consult with window and sealant manufacturers to verify window installation and detailing to assure no leakage into the wall assembly. Consult with window manufacturer regarding window and flashing assemblies with thermal breaks to avoid condensation. Test the final assembly using materials and sub-trades associated with the project to verify performance.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

ATTENTION
Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, or for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

   b. Sto Gold Fill® with StoGuard®
      Mesh (joints ≤ ⅛ inch [3 mm])
   c. StoGuard® Fabric with StoGuard®
      waterproof air barrier membrane
      (joints ≤ ⅛ inch [3 mm])

2. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm)
      (Not for use with Sto Guard Fabric)

3. Refer to product bulletins and Sto Specification S 507x for complete
   information on Sto products. Refer to StoGuard® Air and Moisture Barrier
   detail series 20.XX for information on detailing with StoGuard®.

4. IMPORTANT. Refer to Sto Detail
   62s.FP for special requirements related
   to Noncombustible Type construction
   and Fire-Resistive Rated Construction

5. Consult with window and sealant
   manufacturers to verify window
   installation and detailing to assure no
   leakage into the wall assembly. Consult
   with window manufacturer regarding
   window and flashing assemblies with
   thermal breaks to avoid condensation.
   Test the final assembly using materials
   and sub-trades associated with the
   project to verify performance.

Insulation Note: Provide drainage
behind insulation board when
appropriate, based on project design
and exposure conditions. Use Sto
Drainscreen™ installed behind
insulation, OR use ribbons of Turbostick
adhesive to install maximum 2’x8’
(600x2400mm) insulation board, OR use
Dow STYROFOAM™ Brand Perimate™
with channels oriented vertically, OR use
other code approved method.

4. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction

5. Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto DrainScreen™ installed behind insulation, OR use ribbons of TurboStick adhesive to install maximum 2’x8’ (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

**ATTENTION**

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.
StoPowerwall®ci
Saddle Flashing

Step 1

Turnout Flanges
(to match the thickness of the component layers to the finished surface plus 1/4" (6mm))

Upturned Flange

Detailed Notes:

1. Parapet flashing pieces 'B' and 'C' are folded as shown and are mirror images of each other. The flat upper portions are designed to overlap over the parapet wall and flat against the upper, intersecting wall. The folded turnouts are to match the thickness of the component layers to the finished surface plus 1/4" (6mm).

2. Parapet flashing piece 'A' is designed to straddle the parapet wall. The upturned flange is placed behind the upper flat flanges of flashing piece 'B' and 'C' and the two downturned legs interlock over the lower portions of the flashing pieces 'B' and 'C' respectively, in a shingle like fashion.

Step 2

Glass Mat Gypsum Sheathing
(Compliance with ASTM C 1177)

StoGuard® Joint Treatment options:
- StoGuard® RapidSeal® with StoGuard® Mesh (joints ≤ 1/4 inch [6 mm])
- Sto Gold Fill® with StoGuard® Mesh (joints ≤ 1/8 inch [3 mm])
- StoGuard® Fabric with StoGuard® waterproof air barrier membrane (joints ≤ 1/8 inch [3 mm])

StoGuard® waterproof air barrier membrane options:
- Sto Gold Coat® (vapor permeable)
- Sto EmeraldCoat® (high perm)
- Sto VaporSeal™ (vapor impermeable)
- Sto AirSeal™ (high perm)
  (Not for use with Sto Guard Fabric)

3. Refer to product bulletins and Sto Specification S 507 for complete information on Sto products. Refer to StoGuard® Waterproof Air Barrier detail series 20.XX for information on detailing with StoGuard®.

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly-designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

IMPORTANT: Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction.
Sto®Powerwall®ci
Scupper Penetration Through Wall

Detail No.: 63s.18
Date: March 2016

Notes:
1. StoGuard® Detail Component options:
   a. StoGuard® RapidFill (joints ≤ 1/4 inch [6 mm])

2. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm)
   (Not for use with Sto Guard Fabric)

3. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®.

4. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction

5. Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of Turbostick adhesive to install maximum 2’x8’ (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

Sto®Powerwall®ci Foam Buildouts

**Detail No.: 63s.20**
**Date: March 2016**

**Notes:**
1. StoGuard® Joint Treatment options:
   a. StoGuard® RapidFill (joints ≤ 1/4 inch [6 mm])
   b. Sto Gold Fill® with StoGuard® Mesh (joints ≤ 1/8 inch [3 mm])
   c. StoGuard® Fabric with StoGuard® air and moisture barrier (joints ≤ 1/8 inch [3 mm])

2. StoGuard® air and moisture barrier options:
   a. Sto Gold Coat® (vapor permeable)
   b. Sto EmeraldCoat® (high perm)
   c. Sto VaporSeal™ (vapor impermeable)
   d. Sto AirSeal™ (high perm)
   (Not for use with Sto Guard Fabric)

3. The maximum thickness of foam plastic insulation allowed by code is typically 4" (100mm).

4. The exposed surface must have a minimum slope of 1:2 (27°). In locations where ice and snow may accumulate, increase the slope.

5. Provide Sto Flexyl™ and mesh on upper surfaces of foam features projecting more than 2"(50mm) from the stucco surface. Feather edges into stucco.

6. Refer to product bulletins and Sto Specification S 507x for complete information on Sto products. Refer to StoGuard® Air and Moisture Barrier detail series 20.XX for information on detailing with StoGuard®.

7. IMPORTANT. Refer to Sto Detail 63s.FP for special requirements related to Noncombustible Type construction and Fire-Resistive Rated Construction

**Insulation Note:** Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of Turbostick adhesive to install maximum 2’x8’ (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.
Sto Powerwall® ci
Fire Protection - Noncombustible Type Construction (NFPA 285) and 1 Hour Non-Load Bearing Fire-Resistive Rated Wall Assembly (ASTM E 119)

**ATTENTION**

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, or the nonperformance of adjacent building components or assemblies, or for other construction activities beyond Sto’s control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

**Notes:**

1. **Interior Wallboard:** minimum 5/8” (16mm) gypsum wallboard in compliance with ASTM C 1396.
2. **Structure:** Minimum 18 ga studs, minimum 3-5/8” stud depth, maximum 16” O.C. stud spacing.
3. **Floorline Firestopping:** if Platform type framing - none; if Balloon type framing - minimum 4 pcf mineral wool in each stud cavity and at each floor line, attached with #2-clips or equivalent.
4. **Stud Cavity Insulation:** none, or any noncombustible batt insulation, faced or unfaced.
5. **Continuous Insulation:** DOW Styroform™ Brand Perimate™ (Draining Channels Face Interior), (Type IV XPS) maximum 3” (76 mm) thick.
6. **Exterior Sheathing:** minimum 1/2” (51 mm) glass mat gypsum sheathing in compliance with ASTM C 1177. Joints treated with StoGuard® joint treatment.
7. **Air Barrier Options:** StoGuard with EmeraldCoat, Sto Guard with Gold Coat, or Sto ExtraSeal.
8. **WRB (Water-resistive Barrier):** none, or No. 15 Grade D Building Paper, or Asphalt Saturated Felt in compliance with ASTM D 226.
9. **Cavity Wall Component:** Sto DrainScreen™
10. **Stucco Assembly:** minimum 2.5# self-furred galvanized diamond mesh metal lath with stucco scratch and brown coat in compliance with ASTM C 926 at minimum 3/4” (19 mm) thick.
11. **Openings:** return stucco into openings at jambs and head minimum 1 inch (25 mm) past back of insulation board (Refer to Sto Detail 63s.05).

**Insulation Note:** Provide drainage behind insulation board when appropriate, based on project design and exposure conditions. Use Sto Drainscreen™ installed behind insulation, OR use ribbons of TurboStick adhesive to install maximum 2’x8’ (600x2400mm) insulation board, OR use Dow STYROFOAM™ Brand Perimate™ with channels oriented vertically, OR use other code approved method.

**IMPORTANT:** Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.
