

STUCCO MEETS THE DEMANDS OF HARSH COASTAL CLIMATES

Faced with choosing an exterior wall system for twin, 18-story condo towers and an eight-story parking deck in Myrtle Beach, S.C., Clint Burdett of architect Jenkins, Hancock and Sides, Columbia, S.C., evaluated several systems before specifying the Sto Powerwall Stucco System. The hard-coat stucco system features an elastomeric finish that allows the stucco to repel water, keep its color longer, and remain flexible—key requirements for the harsh coastal environment.
