

Building with conscience.

StoColor® Metallic

Metal panel look for wall systems

Facades

Interiors

StoColor® Metallic offers designers further flexibility and expands the already extensive creative options under the Sto umbrella with the ability to achieve a metallic panel look with a variety of color and texture options.

Options abound with StoColor Metallic in both color selection and surface application. All 15 standard colors can be applied over smooth or textured surfaces offering the versatility to create a custom look while utilizing standard finishes. The result, however, is beyond standard, attaining a reflectivity and luminosity that previously could be only found in natural metals. The colors subtly shift as your perspective does, mimicking the manner in which light shimmers off metal surfaces. StoColor Metallic is a cost-effective solution for creating multiple facade looks while achieving continuous insulation in a single system.

StoVentec® Render
with Keweenaw Bronze Metallic

An easy-to-apply coating system that achieves the look of metal panels

StoColor Metallic is an acrylic-based coating with metallic effect pigments. Used over prepared vertical, above grade StoTherm® ci Systems, and interior drywall surfaces, it offers the aesthetic appeal of metal panels at a fraction of the cost while providing an additional level of protection. The coating system features, StoColor Metallic Top Coat, a lightweight, breakthrough new acrylic-based coating with metallic effect pigments, which is remarkably easy to apply with both textured and smooth substrates. First, using either a roller or proper spray equipment, the entire surface is covered with StoColor Metallic Base. Next, two coats of StoColor Metallic Top Coat in your chosen hue are applied. It's the combination of the two layers that creates the luminous depth, allowing subtle light-induced color shifts to produce the dynamic metal look.

With Sto, your creative exploration can take you anywhere. Our proven products give you unmatched freedom and the ability to achieve your vision in any color, any form, any texture, any material. StoColor Metallic opens up even more creative roads down which designers can venture. Any gleaming idea that comes into their mind now has a metallic Sto solution, unrestricted by hue or texture. Your creative freedom should have no limits.

Creativity Begins. **Sto Finishes.**®

Features	Benefits
Compatible with StoTherm ci, StoTherm ci XPS, StoVentec® Render systems	Get the look of metal while achieving continuous insulation in a single system
Textured or smooth metallic look in multiple colors	Design versatility
Can be combined with the look of other Sto architectural finishes	Economy, compatibility and continuity: combine the look of metal panels with brick, stone, wood, and/or plaster on one StoTherm ci substrate
Water-based components	Safe and easy cleanup
Low VOC	Can qualify for LEED or other sustainable design programs
