Results are based on lab testing under controlled conditions. Results can vary between labs or from field tests. * Based on tests performed with joint treatment and no air barrier top coat

---

**Features**

1. **Waterproof material**
   - Minimizes risk of water damage

2. **Vapor Permeable**
   - Minimizes risk of condensation in walls

3. **Structural and durable**
   - Rigid and stable under air pressure loads; does not tear or blow off the wall with wind

4. **Spray applied with airless spray equipment**
   - Easy, fast installation; does not require specialized spray equipment

5. **Water-based and low VOC**
   - Safe, VOC compliant, easy clean-up, improved IAQ

6. **Compatible with other StoGuard Products**
   - Reliability and peace of mind

---

Sto AirSeal is a fluid-applied vapor permeable air barrier and water-resistant barrier (WRB). It is used over prepared vertical above grade concrete, concrete masonry, brick masonry, wood and glass mat gypsum sheathing walls. It can be used behind StoTherm® ci and other claddings such as metal panels, stone and brick veneer with a cavity, stucco or adhered masonry veneer over metal lath, and wood, vinyl or fiber cement siding.

**Approximate Coverage**

- 85-105 ft² (7.9 – 9.8 m²) per pail when applied at 66 wet mils (40 mil DFT).
- 125 -145 ft² (11.6 – 13.5 m²) when applied at 50 wet mils (30 mil DFT).
- 315 -375 ft² (29.3 – 34.8 m²) when applied at 20 wet mils (12 mil DFT).

Coverage may vary depending on substrate conditions, application technique, waste factor, and final film thickness. CMU substrates will generally be on the lower end of the coverage range.

Construct a mock-up under actual conditions of use to verify proper surface preparation, number of coats required, coverage, and method of application, for approval by the appropriate authority.

---

**Packaging**

- 5 gallon (19 L) pail

---

**Color**

- Teal

---

**Shelf Life**

- 18 months, if properly stored and sealed.

---

**Storage**

- Store in a cool, dry area.
- Protect from extreme heat [90°F (32°C)], freezing, and direct sunlight.
**Sto AirSeal**

**Surface Preparation**

Surfaces must be fully cured, structurally sound, clean, dry, and free of frost, damage, and all bond-inhibiting materials, including dirt, dust, efflorescence, form oil and other foreign matter. Sheathing must be Exterior Grade or Exposure 1 wood-based sheathing or building code compliant glass mat gypsum sheathing. Sheathing must be installed in compliance with the building code and manufacturer’s recommendations. Treat sheathing joints, inside and outside corners, rough openings, and transition details with appropriate StoGuard components. Refer to Sto Details. Pre-treat defects such as knots in wood-based sheathing, vacant fastener holes, and minor cracks (up to 1/16 inch [1.6 mm] wide) in concrete and CMU with Sto AirSeal. If cracks are structural consult an engineer. Note: for fast drying in cold or damp weather use Sto Rapid products for detailing and pre-treatments. Apply Sto AirSeal over the Rapid products within 48 hours of their drying.

**Mixing**

Mix to a uniform consistency with an electric drill and clean, rust-free paddle.

**Application**

Provide adequate ventilation and ensure surface and ambient temperatures are between 40°F and 100°F (4°C and 38°C) during application and drying period. Apply only to fully cured, structurally sound, clean, dry, properly prepared, frost-free surfaces.

**Spray Application**

Apply Sto AirSeal to the prepared substrate using airless spray equipment that pumps a minimum 1 gallon (3.8 L) per minute. Suggested tip size is .029. Pressure and tip size may vary depending on equipment used. Spray uniformly at thickness of approximately:

- 20 wet mils to achieve minimum 12 mil DFT for StoTherm ci (EIFS)
- 50 wet mils to achieve minimum 30 mil DFT for other cladding
- 66 wet mils where 40 mil DFT is specified. If necessary, allow material to set slightly (up to 1 hour depending on weather and substrate conditions), and double back with a second pass to achieve total thickness. Alternatively, apply in two coats, allowing the first coat to fully dry. CMU surfaces may require back rolling of the first pass with a ¾ or 1 inch (19 or 25 mm) synthetic nap roller depending on porosity, joint profile, trueness of the wall surface, and other variables that may exist. Avoid excess build-up of wet material to prevent sag, especially on non-porous surfaces and during cold or damp weather.

**Roller Application**

Roller application is recommended at detail areas such as treatment of sheathing joints and rough openings with StoGuard Fabric. Sto AirSeal may also be applied by roller for StoTherm ci (EIFS) to achieve 20 wet mils (12 mil DFT). Airless spray is recommended for thicker applications. If applying by roller multiple applications may be needed. Use a ¾ inch (19 mm) synthetic nap roller and apply liberally.

**Drying**

Product dries in 24 hours under normal drying conditions [70°F (21°C), 50% RH]. Final dry time varies depending on temperature/humidity, thickness of application, and surface conditions. Cold weather and/or damp conditions prolong drying. Protect from rain and freezing until completely dry. If temporary heaters are used ventilate to the exterior to prevent water vapor from accumulating on or within the wall assembly components.

**Clean Up**

Clean tools and equipment with water immediately after use. Dried material can only be removed mechanically.

**Limitations**

- Apply only when surface and ambient temperatures are between 40°F and 100°F (4°C and 38°C) during application and drying period. Do not apply if the surface temperature is less than 5°F (2.8°C) above the ambient dew point temperature.
- Do not use below grade or on surfaces subject to water immersion.
- Allowable weather exposure: 180 days, 90 days for StoTherm ci cladding.
- Allowable in-service temperature range: -40°F to 180°F (-40°C to 82°C)
- Fire-retardant or pressure treated plywood must be dry with surface free of salts or other chemicals migrating from within the wood. Test adhesion to be sure of desired results.
- Use a slip sheet (typically one layer of building paper or Sto DrainScreen® and building paper) between Sto AirSeal and stucco or adhered masonry veneer over metal lath.

**Health And Safety**

**Health Precautions**

**WARNING!**

May cause eye and/or skin irritation.

**Safety Precautions**

Wash hands thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.

**First Aid:** Eye Contact: Immediately flush eyes with plenty of water for at least 15 to 20 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention. Skin Contact: Immediately wash skin with plenty of soap and water for 15 to 20 minutes, while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists.

**Inhalation:** If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention.

**Ingestion:** If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person. Store locked up.

**Spills:** Dry stage: Sweep and dispose of in proper receptacle. Wet stage: Add absorbent, sweep up and discard. Keep out of sewers and other public water systems.

**Disposal:** Dispose of in accordance with local, state or federal regulations.

**Warning:** KEEP CONTAINER CLOSED WHEN NOT IN USE. KEEP OUT OF THE REACH OF CHILDREN. NOT FOR INTERNAL CONSUMPTION FOR INDUSTRIAL USE ONLY. Consult the Safety Data Sheet on www.stocorp.com or by calling 1-800-221-2397 for further health and safety information.

**LIMITED WARRANTY**

This product is subject to a written limited warranty which can be obtained free of charge from Sto Corp.

**Attention**

This product is intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. It should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, or for other construction outside of Sto’s control. Improper use of this product or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to this product, and to the structure of the building or its components. Sto Corp. Declines All Warranties Expresed or Implied Except For Explicit Limited Warranties Issued To and Accepted By Building Owners in Accordance With Sto’s Warranty Programs Which Are Subject to Change From Time to Time. For the latest, most current information on proper application, cleanup, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.
