An acrylic-based textured coating used over prepared vertical concrete, stucco, existing EIFS, tilt-up, or masonry surfaces. Also used as a skid resistant horizontal coating on concrete surfaces exposed to light pedestrian traffic such as balconies, decks, and walkways.

Coverage
75 – 100 ft² per gal, depending on substrate’s smoothness (1.8 – 2.4 m² per L).

Packaging
5 gallon (19 L) pail.

Shelf Life
18 months in original, unopened, properly stored container.

Storage
Store in dry area between 50°F (10°C) and 85°F (29°C). Protect from extreme heat, freezing, and direct sunlight.

Surface Preparation
All surfaces must be structurally sound, clean, dry, and free of frost and surface contamination such as dust, dirt, salts, grease, oils, efflorescence, mold, algae, mildew, and any other contamination that may affect adhesion. Use appropriate repair methods for the substrate to repair pitting, spalls, cracks, peeling, blistering, delamination, weak surface conditions such as laitance, water damage, or other defects that may exist.

Pressure washing is a recommended means of surface preparation. Follow necessary safety precautions and adjust pressure to avoid damage to the underlying substrate or substrate condition. For mold, algae, and mildew removal, treat surfaces with a commercial mildew removal and/or wash product carefully following manufacturer’s application and safety directions. Rinse thoroughly with clean water, and allow a minimum of 24 hours to dry thoroughly.

Mixing
Use at a preconditioned temperature of 70 ± 5°F (21 ±3°C). Mix undiluted for 3 minutes using a slow speed drill and a mixing paddle. Mix thoroughly to a uniform consistency.

Application
Apply only to sound and clean, dry, properly prepared, frost-free surfaces. Do not apply over damp surfaces or during rain, hail, or snow events or if rain, hail, or snow is imminent. Apply in two uniform coats by brush, roller or with proper spray equipment to prepared/primed substrate. Apply coating in a continuous application, always working from a wet edge or architectural break to eliminate cold joints. Back roll open texture surfaces such as concrete masonry. Achieve 4.2-5.3 DFT per coat. Allow sufficient time for drying between coats.

IMPORTANT
ALWAYS check color for proper match. If color does not match, STOP–call your Sto representative. Minor shade variations may occur from batch-to-batch (refer to batch number on pail). Avoid installing separate batches side-by-side and avoid application in direct sunlight. Avoid installing new coating adjacent to weathered or aged coating. Sto Corp. will not be responsible for shade or color variation from batch-to-batch, variation caused by application or substrate deficiencies, or fading resulting from natural causes such as weather. See Tech Hotline Nos. 0694-C, 0893-EC and 1202-CF for helpful tips on prevention of color problems.

Prevent or repair leaks from roofs, parapets, windows, sealants, or other components of construction, and prevent accumulation of water inside the wall assembly during or after construction. Water accumulation behind the coating could cause damage to the coating or underlying construction.

Prepare a job site mock-up of the final coating assembly to verify aesthetics and adhesion to properly prepared/primed surfaces as specified by design professional or owner’s quality assurance agent.

Substrates and Recommended Primers:

</tbody>
</table>

Note: StoPrime Conditioner is recommended as a surface conditioner and supplemental component for chalking substrate conditions. Selection of primer may vary depending on actual substrate conditions such as pH, absorption, texture, and desired aesthetic look.

Horizontal Concrete
Apply one coat, 8 – 10 wet mils by spray or roller as a prime coat to prepared substrate. Allow to dry until tack free, approximately 1-4 hours depending upon ambient conditions. Avoid applying in excess. Apply a second coat, 8-10 wet mils, and allow to dry. Allow to dry a minimum of 24 hours before exposing to pedestrian traffic.

Curing/Drying
Dries within 24 hours under normal drying conditions [70°F (21°C), 50% RH]. Drying time varies with temperature/humidity and surface conditions. Protect installed product from rain, freezing, foot traffic, and continuous high humidity until completely dry.

Clean Up
Clean tools and equipment with water immediately after use. Dried material can only be removed mechanically.
StoColor Texture Fine

Limitations

- Protect installed materials from rain, freezing, foot traffic, and continuous high humidity until completely dry
- Apply only when the ambient and surface temperatures are 45°F (7°C) and rising
- Do not apply if the surface temperature is less than 5°F (2.8°C) above the ambient dew point temperature
- Do not apply in freezing conditions or during precipitation

- Do not overcoat with solvent-based materials
- Do not use below grade, or in areas of ponding water. Provide proper slope to shed water
- Do not use on surfaces subject to continuous or intermittent water immersion or hydrostatic pressure
- Do not use in areas exposed to medium or heavy pedestrian traffic or in areas exposed to vehicular traffic
- Efflorescence of Portland cement-based substrates such as concrete, stucco, and concrete masonry sometimes causes staining or discoloration on the surface of applied coatings. Efflorescence is neither caused nor prevented by the Sto coating.

Health And Safety

WARNING! Causes eye and skin irritation.

Precautionary Statement
Wash hands thoroughly after handling.

FIRST AID MEASURES
Eye Contact: Immediately flush eyes with plenty of water for at least 15 to 20 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention. Skin Contact: Immediately wash skin with plenty of soap and water for 15 to 20 minutes, while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists. Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention. Ingestion: If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

Spills
Collect with suitable absorbent materials such as cotton rags.

Disposal
Dispose of in accordance with local, state or federal regulations.

Warning
KEEP CONTAINER CLOSED WHEN NOT IN USE. KEEP OUT OF THE REACH OF CHILDREN. NOT FOR INTERNAL CONSUMPTION. FOR INDUSTRIAL USE ONLY. Consult the Safety Data Sheet (SDS) on www.stocorp.com for further health and safety information. LIMITED WARRANTY
This product is subject to a written limited warranty which can be obtained free of charge from Sto Corp. Refer to Sto Specifications for more complete information on proper use and handling of this product.

Attention
This product is intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. It should be installed in accordance with those specifications and Sto’s instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, or for other construction activities beyond Sto’s control. Improper use of this product or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to this product, and to the structure of the building or its components. Sto Corp. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO’S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.
