PRODUCT BULLETIN

StoPrime® Block Surfacer HP
Product Number: 81520

PRODUCT DESCRIPTION
StoPrime Block Surfacer HP is a high build alkali resistant primer for use on vertical above grade walls over concrete, concrete masonry and stucco. Its primary purpose is to fill concrete block surfaces prior to the application of Sto top coats.

COVERAGE (per pail)
440 - 470 ft² (40.8 – 43.6 m²)

Coverage will vary depending on substrate condition and texture, application technique, waste factor, final film thickness, and other variables that may exist.

Packaging: 5 gallon pail (19L)
Shelf Life: 12 months, if properly stored and sealed.

Storage: Store in a dry area, between 50°F (10°C) and 85°F (29°C). Protect from direct sunlight, extreme heat [90°F (32°C)] and freezing.

FEATURES | BENEFITS
--- | ---
Alkali resistant to pH 13.0 | Can be applied on cementitious substrates before finish coating to resist blistering, fading.
Acrylic-based | Excellent adhesion; weather resistant
Vapor Permeable | Allows substrate to breathe naturally; resists blisters caused by trapped vapor
Water Based | Cleans up with water
Low VOC | Safe for workers and the environment

SURFACE PREPARATION
All surfaces must be structurally sound, clean, dry, and free of frost and surface contamination such as dust, dirt, salts, grease, oils, efflorescence, mold, algae, mildew, or any other condition that may affect adhesion. Use appropriate repair methods for the substrate to repair pitting, spalls, cracks, peeling, blistering, delamination, weak surface conditions such as laitance, water damage, or other defects that may exist. If pressure washing, follow necessary safety precautions and adjust pressure to avoid damage to the underlying substrate. For mold, algae, and mildew removal, treat surfaces with a commercial mildew removal and/or wash product, carefully following manufacturer’s application and safety directions. Rinse thoroughly with clean water and allow a minimum of 24 hours to dry thoroughly before application of coating.

MIXING
Use at a preconditioned temperature of 70 ± 5°F (21 ± 3°C). Mix undiluted product for 3 minutes using a slow-speed drill and a mixing paddle. Mix thoroughly to a uniform consistency.

HEALTH & SAFETY
WARNING: Causes eye and skin irritation.
Precautionary Statement: Wash hands thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.
FIRST AID MEASURES: Eye Contact: Immediately flush eyes with plenty of water for at least 15 to 20 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention.
Skin Contact: Immediately wash skin with plenty of soap and water for 15 to 20 minutes, while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists.
Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention. Ingestion: If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person. Store locked up.
Spills: Collect with suitable absorbent material such as cotton rags.
Disposal: Dispose of in accordance with local, state or federal regulations.
Warning: KEEP CONTAINER CLOSED WHEN NOT IN USE. KEEP OUT OF THE REACH OF CHILDREN. NOT FOR INTERNAL CONSUMPTION. FOR INDUSTRIAL USE ONLY. Consult the Safety Data Sheet (SDS) on www.stocorp.com for further health and safety information.
StoPrime® Block Surfacer HP
Product Number: 81520

APPLICATION
Vertical Wall Surfaces
Apply only to sound and clean, dry, properly prepared, frost-free surfaces. Do not apply over damp surfaces or during rain, hail, or snow events or if rain, hail, or snow is imminent. Apply with brush, roller, or proper spray equipment in a continuous coat, always working from a wet edge or architectural break to eliminate cold joints. Back roll open texture surfaces such as concrete masonry. Allow sufficient time for drying between coats.

Spray Application
Apply to the prepared substrate using airless spray equipment that pumps a minimum 1 gallon per minute (GPM). Suggested tip size is minimum .025. Pressure and tip size may vary depending on equipment used and technique. Spray uniformly at a thickness of 14-16 wet mils to achieve 7.7-8.8 DFT. Use overlapping horizontal sweeping motions for continuous coverage. For best results back roll porous surfaces with 1 to 1-1/2 inch (25-38 mm) synthetic nap roller to fill voids and eliminate pinholes. Use thick nap roller for rough surfaces such as split face CMU.

Roller Application
Apply minimum two uniform coats with a 1 to 1-1/2 inch (25-38 mm) synthetic nap roller to achieve total 7.7-8.8 DFT.

Curing/Drying
Product dries within 24 hours under normal drying conditions [70°F (21°C), 50% RH]. Drying time varies with temperature/humidity and surface conditions. Protect installed product from rain, freezing, and continuous high humidity until completely dry.

Clean Up
Clean tools and equipment with water immediately after use. Dried material can only be removed mechanically.

LIMITATIONS
- Apply when ambient and surface temperatures are 40°F (4°C) and rising, and below 100°F (38°C)
- Do not apply if the surface temperature is less than 5°F (2.8°C) above the ambient dew point temperature.
- Do not use below grade, or in areas subjected to hydrostatic pressure, water immersion, ponding, or puddling.
- Do not overcoat with solvent-based materials.
- Efflorescence of Portland cement-based substrates such as concrete, stucco, and concrete masonry sometimes causes staining or discoloration on the surface of applied coatings. Efflorescence is neither caused nor prevented by the Sto coating.
- Not for use on wood or metal surfaces

LIMITED WARRANTY
This product is subject to a written limited warranty which can be obtained free of charge from Sto Corp.
