StoTherm® ci Over Masonry
Surface Mount Fixture Attachment Through StoTherm® ci

Notes:
1) Provide minimum 6 inches (152 mm) clearance between StoTherm® ci termination and finished grade. Increase distance above grade for snow regions.

2) Provide cementitious damp proofing or waterproofing as needed below grade and on exposed masonry above grade. Counter flash StoTherm® ci over damp-proofing/waterproofing. Where StoTherm® ci and non-cementitious damp-proofing/waterproofing meet, verify compatibility of StoTherm® ci components.

3) Provide adequate slope of finished grade away from structure for drainage.
