

## Job Description

**Title:** Quality Assurance Technician

**Location:** Atlanta, GA 30331

**Reports to:** Quality Assurance Supervisor

**Purpose:**

Sto Corp. (Sto), a global innovation leader of building enclosure systems and high-performance facade coatings, is seeking a **Quality Assurance Technician**. The ideal candidate will be responsible for performing testing on all incoming raw materials and finished goods ensuring that our customers receive the highest quality products. This role will also provide support to other manufacturing operations outside of the lab, as the workload allows.

**Essential Duties & Responsibilities (includes, but not limited to):**

- Test incoming raw materials and outgoing finished goods to verify that they meet Sto specifications and fall within process capability.
- Maintain SAP quality data, provide usage decisions and recommend adjustments based on historical data.
- Read and interpret statistical process data to improve manufacturing processes.
- Contribute as needed to help maintain Plant Hygiene program.
- Complete reports including Statistical Process Control charts, project status summaries or ISO work instructions.
- Maintain all lab equipment including calibrations as scheduled.
- Write and maintain clear and understandable Job Procedures for the Quality Assurance testing process in ISO 9000 work instruction format.
- Maintain clean working environment including clear work surfaces, clean and well-maintained equipment, clearly labeled storage areas, etc.
- Support product scale-ups and modifications by occasionally watching production batches and ensuring adherence to established work instructions and recipes.
- Participate in customer complaint and non-conforming product investigations and provide corrective actions as needed.
- Support Production and Receiving functions as needed.
- Follow and comply with all safety policies, plant work rules and regulations.
- Other duties as assigned.

**Knowledge/Skills/Abilities:**

**Education:** Minimum requirement is a high school diploma or equivalent

**Experience:** Prefer 2 years of laboratory experience in an industrial environment, but will consider production experience in lieu

**Skills:**

- Must be able to read/comprehend written and oral instructions in English; read and comprehend safety rules, operating and maintenance instructions, technical lab procedure manuals and product recipes/material identifications.
- Must have a working knowledge of SAP systems.
- Any knowledge of paint, synthetic stucco or cement chemistry would be an asset.
- Must be able to write legibly to keep records and to correspond as needed.
- Must have mathematical skill to add, subtract, multiply and divide and the ability to perform these operations using units of weight measurement and volume.
- Must be able to effectively communicate one-on-one and in small group situations.
- Must have manual dexterity sufficient to use a wide variety of standard lab equipment including a scale, ovens, mixing equipment, viscometers and the ability to operate standard office equipment such as a computer, a calculator, telephone, and photocopier.
- Individual must be able to differentiate color.
- This position may require the obtainment of a forklift operator's license.
