

# A WINNING COMBINATION

KAWNEER AND STO PANEL  
TECHNOLOGY PROVIDE THE  
PERFECT ALL-IN-ONE PACKAGE

Kawneer has collaborated with Sto Panel Technology on two custom window designs – the 8225TL and the AA4325, a high thermal system with high design pressure capabilities. With the fully tested panel and window exterior wall solution, a window can be installed in less than 15 minutes, saving valuable time on site.

We further strengthened our partnership this year by collaborating on two healthcare projects and two student housing projects.

## FACILITATING BETTER HEALTHCARE

### **Ascension St. John Outpatient Rehabilitation**

Kawneer furnished ML Jones with Kawneer's 8225TL Unitized Window System to be integrated into Sto Panel Technology's Classic NExT ci & MVES ci panels for the completion of Ascension St. John Outpatient Rehabilitation Tulsa.

“

Kawneer provided the 8225TL window for the StoPanel® on schedule and assisted us with installation training in our shop, helping to ensure the project was a success...great team effort! We look forward to using this system on future projects.

**Travis Jones,  
Director of Fabrication,  
ML Jones**

### **Banner Desert Medical Center**

A second healthcare project combining Kawneer's 8225TL Unitized Window System and StoPanel® is for Banner Desert Medical Center in Phoenix. Kawneer worked closely with Kapture Prefab and MKB on the construction of a four-story, 330,000-square-foot medical center, which has now been completed.

# ACCOMMODATING HIGHER EDUCATION

## The Standard at College Park

Kawneer's 8225TL window and standard receptor was used by Southern Wall Systems and Landmark Properties, for an off-campus student living community project.

The Standard at College Park is a nine-story high-end housing complex at The University of Maryland, which will open in 2023.

Their window team were excellent to work with from submittals through completion of the installation. Their ability to meet our delivery deadlines, along with their continuous on-site installation training and technical support, made this project a success for us. We will not hesitate to use Kawneer again and to recommend them on future projects.

**Tom Taylor,**  
Director of Glass & Glazing

## University of California's Student Housing Project

Kawneer supplied a 1600 SS Curtain Wall and GLASSvent® UT (Ultra-Thermal) Windows in StoPanel® for the University of California at San Diego student housing project, working closely with Kapture Prefab, Nevell Group and Kitchell Construction.

One of many suppliers involved, Kawneer has provided continuous technical support during the mock-up testing process, allowing this project to move forward.

**Tanya Sanchez Trejo,**  
Senior Project Manager,  
Kitchell Construction

# GUIDING YOU EVERY STEP OF THE WAY

Our full customer support includes initial window design recommendations, estimating and assistance with the ordering process. We also provide comprehensive technical support in the field with installation training in the shop and on site, and laboratory assistance during mock-up testing.

More than 1,500 experienced Kawneer dealers throughout North America are ready to help you take on the increased scope of windows, installing the systems in the Sto Panel Technology affiliates shop. We also have a seven-minute installation video, which can be shared with you and your team.
