

Job Description

Title: Daily Sample Production Technician

Location: Atlanta, GA 30336

Reports to: Corporate QA/Color Manager

Purpose:

Sto Corp. (Sto), a domestic and global innovation leader of building envelope systems and high-performance facades, is seeking a skilled **Daily Sample Production Technician**. The ideal candidate will be responsible for producing accurate, high-quality color samples and customer-requested materials while ensuring production schedules, color standards, and quality requirements are consistently met, along with shipping of daily sample orders. This role requires a detail-oriented, self-motivated individual with strong organizational skills and the ability to work independently or as part of a team.

Essential Duties & Responsibilities (includes, but not limited to):

- Organize daily production orders according to order numbers, material types, and production priorities.
- Print labels for various container sizes based on order requirements, organize for 8x8 sample boards and accurately label containers and retain boards.
- Fill containers with designated materials according to production specifications.
- Scale colorant recipes accurately into containers and mix materials thoroughly to ensure consistency.
- Perform color checks on both wet and dry material to verify compliance with approved standards.
- Apply finishes and paints according to order specifications and customer requirements.
- Maintain accurate records of completed orders and production activities.
- File and maintain retain boards for quality control and future reference.
- Maintain inventory levels of sample materials, colorants, containers, labels, and packaging supplies.
- Prepare completed samples for shipment and coordinate with warehouse personnel as required.

- Maintain a clean, organized, and safe work area.
- Ability to learn limited SAP software and MS365.
- Follow all company safety policies and procedures.
- Assist with training new team members as needed.
- Cross-train in other production functions and provide support where required.
- Perform other duties as assigned.

Education & Experience:

- High school diploma or GED required.
- 1-3 years of experience in manufacturing, production, sample preparation, or a related environment preferred.
- Experience working with paints, coatings, stucco, plaster, colorants, or color matching processes is desirable.
- Experience using hand tools, scales, mixing equipment, and labeling systems preferred.

Knowledge & Skills:

- Strong organizational skills with the ability to manage multiple orders and priorities simultaneously.
- Ability to accurately follow formulas, recipes, and production instructions.
- Ability to differentiate colors and make color evaluations.
- Excellent attention to detail.
- Basic math skills related to decimals required for measuring, scaling, and mixing materials.
- Ability to maintain accurate records and documentation.
- Familiarity with OSHA safety practices and procedures.
- Strong problem-solving and decision-making skills.
- Ability to communicate effectively both verbally and in writing.
- Self-motivated with the ability to work independently.

- Proficient with basic computer applications, including Microsoft 365.
- Ability to work effectively in a team environment.
- Must maintain excellent attendance and reliability.

Physical Demands:

The characteristics listed below are representative of the physical demands required by an individual to successfully perform the essential duties of this position. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential duties.

- Regularly required to stand, walk, bend, stoop, kneel, crouch, and use hands to handle materials and equipment.
- Frequently required to lift, carry, and move materials throughout the workday.
- Must be capable of lifting and/or moving up to 70 pounds.
- Specific vision abilities required include close vision, color differentiation, depth perception, and the ability to adjust focus.
- Ability to perform repetitive tasks involving mixing, labeling, and sample preparation.

Work Environment:

- Position is in a manufacturing and warehouse environment.
- Requires extended periods of standing and physical activity.
- Requires use of personal protective equipment, including safety glasses, gloves, safety shoes, and other equipment as required.
- Work is primarily performed indoors; temperatures may vary depending on seasonal conditions.
- Regular exposure to pigments, coatings, raw materials, and moving mechanical equipment.
